EVIDENCE STATUS

Disclosure schedule	**Degraded**	Fee wording incomplete S2

> SYNTHETIC TEST handoff for committee-memo regression coverage. This paste-ready authoritative markdown reviews a fictional composite report and invented disclosure schedule.

- **Overall assessment:** Satisfactory with follow-ups.
- Required return history is present; the fee and significant-event disclosures need clarification.

Key judgment — evidence balance

Observation: Met is 3 and Not met is 1 S1. Why it matters: The evidence is mixed. Uncertainty: The review is document-bound. What would change the view: Additional governed evidence that changes either count.

Key judgment — partial support

Observation: Partially met is 1 S1. Why it matters: Partial support limits a clean conclusion. Uncertainty: Missing documents may exist. What would change the view: Complete evidence for the partially supported requirements.

Key judgment — evidence gaps

Observation: Not found is 0 S1. Why it matters: Unlocated evidence remains outside the assessment. Uncertainty: Absence from the supplied record is not proof of absence. What would change the view: A current document resolving the gap.

Analysis — Disclosure timing unclear

Observation: The significant event is named without an effective date S1. **Why it matters:** readers cannot place the event within the presented record. **Uncertainty:** the date may exist in evidence not supplied. **What would change the view:** No additional follow-up beyond request 1.
