BOTTOM LINE

GradientCIO is connected and healthy for organization Gradient **S1 S2**.
 Nine of eleven skills are ready; the macro briefing is ready with one view unavailable, and the IC memo needs the Portfolio and Strategy Lab modules for live portfolio data **S2**. 13 of 14 contract checks passed; the one failure (macro regime state, HTTP 500) is a known issue the skills work around **S3**.

What to do next

Nothing is blocking day-to-day use. To write IC memos from live portfolio data, license the Portfolio and Strategy Lab modules; until then the memo can be written from holdings you supply.

Try next

Prompts that work for this organization today

- 01

Run an ODD report on Ridgeview Global Macro Fund II.

Your one roster fund; a new Form ADV was filed after its last review.
- 02

Give me this week's manager monitoring digest, and schedule it for Mondays.

Keeps the roster under watch without manual checks.
- 03

Build the macro briefing deck for Thursday's committee.

Uses The Read, rates, Gradient signal, calendar and CMAs.
