EVIDENCE COVERAGE

GIPS policies manual	**Available**	Fictional sections 2–13, revised 2025-12-31 S1
Policy change log	**Degraded**	Prior review listed; current signed approval absent S2

- **Overall assessment:** Material concern. Core composite and calculation policies exist, but current approval is not evidenced and six policy areas remain partial S1 S2.

Key judgment — core calculation rules exist

The manual states four core areas: TWR, accrual, fee and theoretical-performance rules S1. Their presence establishes a calculation foundation, but the review still depends on whether each rule is current, operationally assigned and consistently supported by retained records.

Key judgment — current governance is unproven

The change log contains no approval record for the current manual S2. Without a dated approval, the review cannot determine whether governance accepted this revision, so a signed record remains necessary to establish currency and accountable authorization.

Key judgment — operational ownership is thin

Valuation, report sign-off and portability controls omit accountable owners S1. The missing assignments materially weaken execution because the manual does not identify who performs, reviews or approves these three recurring control responsibilities when exceptions arise.

Key judgment — three policy areas are absent

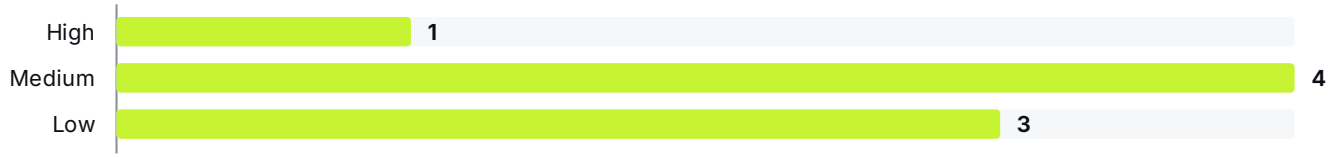

Three policy areas were not located: significant cash flows, distribution tracking and record retention S1. Their absence leaves portfolio treatment, recipient evidence and retention duties undefined, requiring separate approved policies or explicit additions to the manual.

FINDINGS BY SEVERITY

HIGH **Current approval not evidenced**
The change log has no signed approval for the current manual S2.

MEDIUM **Error threshold absent**
The error policy omits materiality thresholds S1.

MEDIUM **Reporting owners absent**
Valuation estimates and report sign-off lack accountable owners S1.

MEDIUM **Benchmark-change timing undefined**
The benchmark policy does not define approval timing S1.

MEDIUM **Portability ownership absent**
The portability policy does not identify its documentation owner S1.

LOW **Cash-flow policy not found**
No ex ante significant-cash-flow policy was located S1.

LOW **Distribution tracking not found**
No reasonable-efforts tracking policy was located S1.

LOW **Retention schedule not found**
No supporting-record retention schedule was located S1.

The current manual has no supplied approval record. Error correction, valuation, benchmark, portability, report-preparation and verification policies lack required specificity; three additional areas are not found in the reviewed manual S1 S2.

Analysis — governance currency is unproven

Observation: No current approval date is evidenced for this revision S2. **Why it matters:** Governance cannot be tied to the reviewed manual version. **Uncertainty:** A signed approval record may exist outside supplied coverage. **What would change the view:** Follow-up request 1 producing dated approval evidence.

Analysis — control specificity is uneven

Observation: Six areas lack owners, timing or thresholds S1. **Why it matters:** Execution is not reproducible from policy. **Uncertainty:** Procedures may sit outside the manual. **What would change the view:** Follow-up request 2 and follow-up request 3.

Analysis — evidence retention is incomplete

Observation: Three required policy areas were not found S1. **Why it matters:** Compliance evidence may not be retained or distributed consistently. **Uncertainty:** Separate approved policies were not supplied for review. **What would change the view:** Follow-up request 4 producing all three policy records.

04 Follow-up requests

01 Provide the current signed policy approval and governance record.
Closes the governance deficiency S2.

02 Provide approved error-correction thresholds and the escalation owner.
Closes the 1.A.20–1.A.21 specificity gap S1.

03 Add owners and timing for valuation estimates, benchmark changes and report sign-off.
Closes three operational-control gaps S1.

04 Provide significant-cash-flow, distribution-tracking and record-retention policies.
Closes the three Not found areas S1.

05 Identify the portability documentation owner and acquired-record inventory.
Closes the portability control gap S1.

06 Define verifier independence review ownership and cadence.
Closes the verification governance gap S1.

1. Provide the current signed policy approval and governance record S2.
2. Provide approved error-correction materiality thresholds and escalation owner S1.
3. Add owners and timing for valuation estimates, benchmark changes and report sign-off S1.
4. Provide significant-cash-flow, distribution-tracking and record-retention policies S1.
5. Identify the portability documentation owner and required acquired-record inventory S1.
6. Define verifier independence review ownership and cadence S1.
