EVIDENCE COMPLETENESS · 10/12

REVIEW CONCLUSION

The portfolio returned 8.4% over the year to 2026-06-30, 0.6pp behind the policy benchmark S4. Historical attribution identifies public-equity selection as the largest negative effect for the review period S5. All allocation bands remain compliant, while private assets and manager concentration are on watch S3. Realized volatility was 9.1%, and the forward assumptions indicate a 6.2% expected return with 10.4% expected volatility S4 S8.

TRAILING 1Y	ACTIVE RETURN	REALIZED VOLATILITY	LIQUID SHARE
8.4%	-0.6pp	9.1%	63.0%
Benchmark 9.0% S4	1Y to 2026-06-30 S4	Benchmark 10.0% S4	Daily to quarterly S3

AT A GLANCE

AREA	EVIDENCE-BASED FINDING	STATUS
Performance	Trailing 1Y return is 0.6pp below the policy benchmark S4.	Watch
Attribution	Public-equity selection is the largest negative effect for the review period S5.	Watch
Allocation / policy	All allocation bands remain inside their governed ranges S3.	Compliant
Risk	Realized volatility is below the benchmark; the private-assets risk contribution is the largest S4 S7.	Available
Liquidity	Daily-to-quarterly assets cover 63.0% of NAV; unfunded commitments equal 9.3% S3.	Compliant
Exposure / concentration	The largest manager is 12.8% of NAV against a 15.0% policy limit S3 S6.	Watch

Scope of this review

This monitoring report provides sourced analysis and considerations for discussion. It does not contain investment recommendations, trades, allocation changes, manager actions or proposed votes.

Key judgment — headline signal

Observation: The fictional TEST report carries a 2 policy items on watch signal S1. Why it matters: This signal focuses oversight on the report's most decision-relevant condition. Uncertainty: Evidence coverage may exclude newer or more detailed observations. What would change the view: A governed refresh showing a different signal or breached threshold.

Key judgment — primary measure

Observation: Trailing 1Y is 8.4% in the TEST evidence S2. Why it matters: This measure establishes the baseline for comparing later governed results. Uncertainty: The source basis may omit newer observations outside this fixture. What would change the view: A refreshed source report showing a change above 1%.

Key judgment — monitoring priority

Observation: Liquid share is 63.0% in the TEST evidence S3. Why it matters: This result determines which item receives priority in the next monitoring cycle. Uncertainty: Supporting coverage may omit later filings or corroborating detail. What would change the view: A new filing or report that resolves the item or changes it by 1%.

02 Mandate, Policy and Data Basis

The framework against which results are monitored

Portfolio	**Example Comprehensive Portfolio (TEST)** S2
Organization	**Example Institution (TEST)** S1
Review period	**2026-04-01 to 2026-06-30** S4
Base currency	**USD** S2
Policy benchmark	**Example Policy Benchmark (TEST)** S4
Return basis	**Net of investment-management fees** S4
Assumption set / regime	**Example 2026 CMA (TEST) / Baseline** S8
Data scope	**Fictional TEST data** S1

POLICY FRAMEWORK

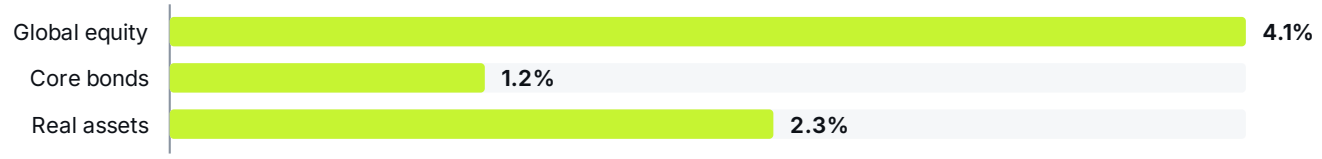

AREA	OBJECTIVE OR LIMIT	OBSERVED	STATUS	SOURCE
Return objective	5.5% nominal over 10 years	6.2% expected return	Compliant	S3 S8
Realized volatility	At or below 12.0%	9.1%	Compliant	S3 S4
Maximum drawdown	Monitor at -18.0%	-12.4%	Compliant	S3 S4
Private assets	15.0% to 30.0%	28.2%	Watch	S3
Single manager	At or below 15.0%	12.8%	Watch	S3 S6

03 Period and Market Context

Context is separate from portfolio evidence

The returned market context describes positive global-equity returns and modestly wider credit spreads during the quarter ended 2026-06-30 S9. These facts provide background only; historical attribution, not market narrative, identifies the portfolio's active-return effects S5.

SELECTED MARKET RETURNS FOR CONTEXT (TEST)

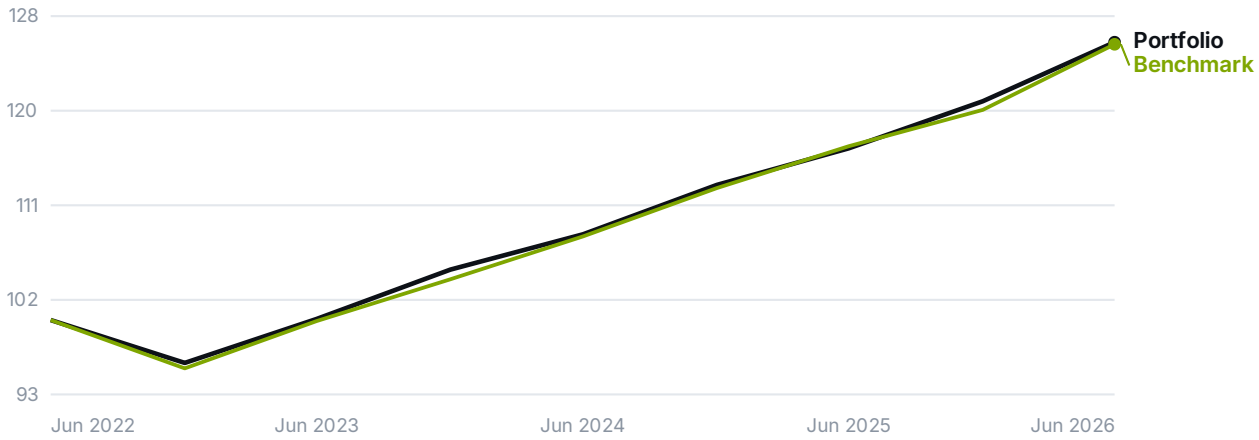

Forward context

The regime and capital-market figures used later are assumptions, not forecasts S8 S9.

04 Historical Returns

Observed performance versus the policy benchmark

GROWTH OF 100 SINCE 2022-06-30 (TEST)

Returned cumulative-growth observations S4.

STANDARD PERIODS TO 2026-06-30

PERIOD	PORTFOLIO	BENCHMARK	EXCESS	COVERAGE
QTD	2.8%	3.2%	-0.4pp	Complete
YTD	4.6%	5.1%	-0.5pp	Complete
1Y	8.4%	9.0%	-0.6pp	Complete
3Y (ann.)	7.1%	7.5%	-0.4pp	Complete
5Y (ann.)	6.3%	6.1%	+0.2pp	Complete
10Y (ann.)	Not available	Not available	Not available	Insufficient History
Since inception (ann.)	6.6%	6.4%	+0.2pp	Complete

Returned period labels, annualization and coverage are preserved S4.

CALENDAR-YEAR EXCESS RETURNS

2026 is partial through June S4.

CALENDAR YEARS

YEAR	PORTFOLIO	BENCHMARK	EXCESS	COVERAGE
2022	-7.2%	-8.0%	+0.8pp	Full Year
2023	9.1%	8.7%	+0.4pp	Full Year
2024	7.5%	8.2%	-0.7pp	Full Year
2025	6.9%	6.5%	+0.4pp	Full Year

YEAR	PORTFOLIO	BENCHMARK	EXCESS	COVERAGE
2026 partial (Jan–Jun)	4.6%	5.1%	-0.5pp	Partial Year

The 2026 partial year is cumulative and is not annualized S4.

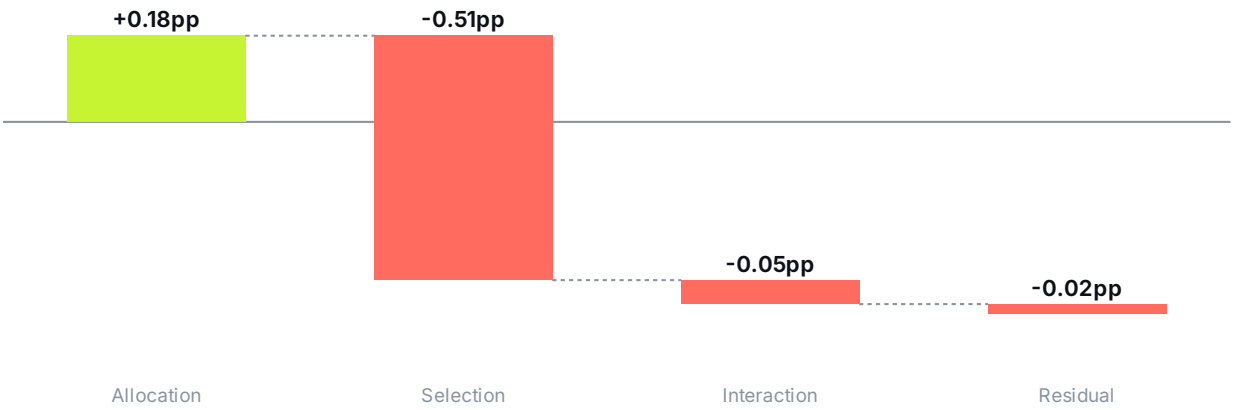

Analysis — Recent relative returns weakened

Observation: The strongest full year is +0.8pp in 2022 and the weakest is -0.7pp in 2024 S4. Why it matters: Recent QTD, YTD and 1Y periods also trail. Uncertainty: Overlapping-period coverage reuses some underlying observations. What would change the view: A full-year report showing sustained relative improvement.

05 Historical Attribution

Realized Brinson-Fachler effects for the review period

ALLOCATION, SELECTION AND INTERACTION

Realized linked effects for the review period S5.

TOTAL ATTRIBUTION EFFECTS

EFFECT	CONTRIBUTION	SOURCE
Allocation	+0.18pp	S5
Selection	-0.51pp	S5
Interaction	-0.05pp	S5
Residual	-0.02pp	S5
Total active return	-0.40pp	S5

SEGMENT ATTRIBUTION

SEGMENT	ALLOCATION	SELECTION	INTERACTION	TOTAL
Public Equity	+0.04pp	-0.31pp	-0.03pp	-0.30pp
Private Assets	+0.06pp	-0.12pp	-0.01pp	-0.07pp
Fixed Income	+0.05pp	-0.05pp	0.00pp	0.00pp
Real Assets	+0.02pp	-0.02pp	-0.01pp	-0.01pp
Cash	+0.01pp	-0.01pp	0.00pp	0.00pp

Rows are sorted by absolute returned total effect S5.

Reconciliation diagnostic

The returned residual is -0.02pp against a 1 bp tolerance; the method details below preserve the server basis and version S5.

RECONCILIATION AND METHOD

Portfolio active return	**-0.40pp** S5
Sum of linked effects	**-0.38pp** S5
Residual	**-0.02pp** S5
Method	**Realized Brinson-Fachler** S5
Linking	**Symmetric Carino** S5
Basis	**Net, monthly linked** S5
Currency	**USD** S5
Formula version / tolerance	**portfolio-attribution-v1 / 1 bp** S5

Analysis — Selection drove the shortfall

Observation: Public-equity selection is the largest negative segment effect at -0.31pp S5. Why it matters: One segment explains most active shortfall. Uncertainty: The unexplained -0.02pp residual remains outside reconciliation coverage. What would change the view: Manager records showing no single source exceeds half the effect.

06 Allocation and Policy Compliance

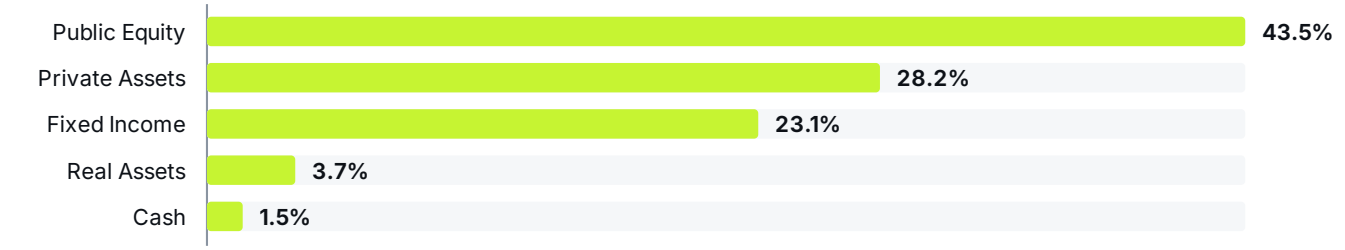

Current weights, policy ranges and headroom

CURRENT WEIGHT VERSUS POLICY RANGE

Governed policy ranges and targets S3.

ACTUAL ALLOCATION BY ASSET CLASS (TEST)

ASSET CLASS VERSUS POLICY

ASSET CLASS	TARGET	ACTUAL	ACTIVE	RANGE	HEADROOM	STATUS
Public Equity	42.0%	43.5%	+1.5pp	32–52%	8.5pp	Compliant
Fixed Income	25.0%	23.1%	-1.9pp	15–35%	8.1pp	Compliant
Private Assets	25.0%	28.2%	+3.2pp	15–30%	1.8pp	Watch
Real Assets	5.0%	3.7%	-1.3pp	2–10%	1.7pp	Watch
Cash	3.0%	1.5%	-1.5pp	0–8%	1.5pp	Compliant

Governed status and headroom are preserved from the policy result S3.

SUB-ALLOCATION VERSUS POLICY

ASSET CLASS	TARGET	ACTUAL	ACTIVE	RANGE	HEADROOM	STATUS
US Equity	24.0%	25.0%	+1.0pp	18–30%	5.0pp	Compliant
Non-US Equity	18.0%	18.5%	+0.5pp	12–24%	5.5pp	Compliant
Core Bonds	15.0%	13.6%	-1.4pp	10–20%	3.6pp	Compliant
Private Credit	10.0%	11.8%	+1.8pp	5–14%	2.2pp	Watch
Private Equity	15.0%	16.4%	+1.4pp	8–18%	1.6pp	Watch

Total-portfolio targets are returned directly; parent and child targets are not multiplied S2 S3.

Peer allocation context

Not licensed — Peer allocation context was skipped because peerIntelligence is not available for this organization. This review uses portfolio evidence only.

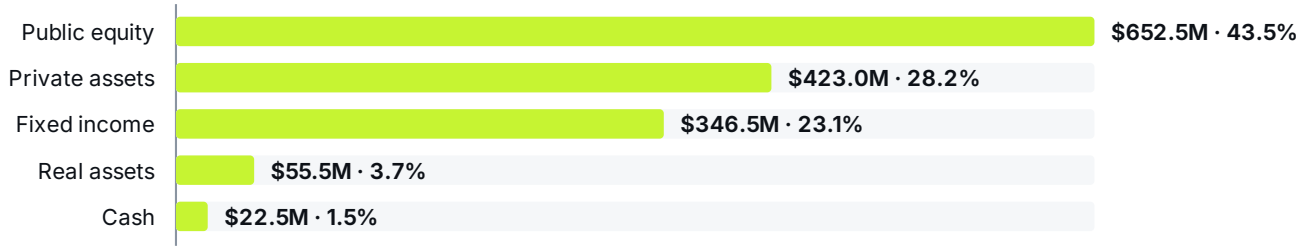

Analysis — Private-assets headroom is narrow

Observation: Private Assets has 1.8pp upper-band headroom and Real Assets sits 1.7pp above its lower band S3. Why it matters: Valuation changes can alter status without policy changes. Uncertainty: Private valuations lag current public-market records. What would change the view: Refreshed valuations widening headroom above 3.0pp.

07 Exposures and Concentration

Holdings, manager and look-through concentrations

VALUE BY EXPOSURE CLASSIFICATION ($M)

Server aggregates exclude unfunded commitments S6.

MEDIUM **Example Manager A review is due**

The manager represents 12.8% of NAV and has an open key-person review item S6 S11.

LARGEST MANAGER AND HOLDING EXPOSURES

EXPOSURE	CLASSIFICATION	VALUE	% NAV	AS OF	COVERAGE
Example Manager A (TEST)	Public equity	$192.0M	12.8%	2026-06-30	Current S6
Example Manager B (TEST)	Private equity	$171.0M	11.4%	2026-03-31	Lagged S6
Example Manager C (TEST)	Fixed income	$157.5M	10.5%	2026-06-30	Current S6
Example Issuer E (TEST)	13F look-through	$28.5M	1.9%	2026-05-15	Partial S10

GOVERNED CONCENTRATION CHECKS

AXIS	OBSERVED	LIMIT	STATUS	SOURCE
Largest allocation	43.5%	52.0%	Compliant	S3
Largest manager	12.8%	15.0%	Watch	S3 S6
Top five managers	46.9%	55.0%	Compliant	S3 S6
Largest issuer look-through	1.9%	Not assessed	Not Assessed	S10

Form 13F coverage

Form 13F can lag quarter end by up to 45 days and covers long US-listed equity positions only. It excludes shorts, cash, non-US listings and private holdings; reported USD values are not FX-converted against NAV S10 .

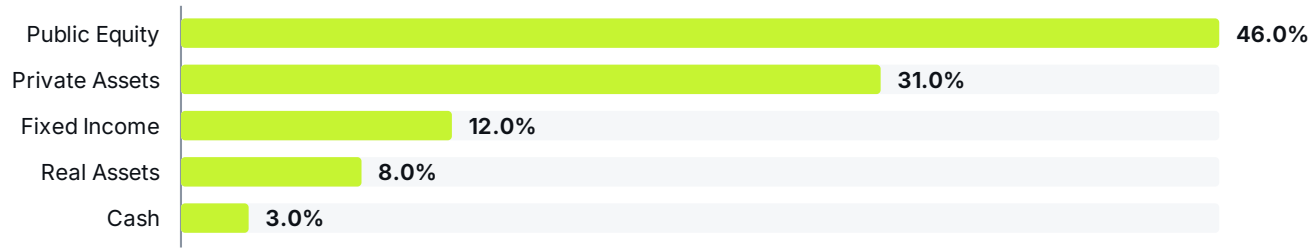

Analysis — Exposure amplifies open findings

Observation: Example Manager A represents 12.8% of NAV and has one open medium finding S6 S11. Why it matters: High exposure can transmit operational concern. Uncertainty: Completed closure evidence for the open finding remains unavailable. What would change the view: Closure records or refreshed exposure below 10.0%.

08 Realized Risk and Decomposition

Observed risk and returned contribution measures

RISK CONTRIBUTION BY ASSET CLASS (TEST)

REALIZED RISK

Annualized volatility	**9.1% (benchmark 10.0%)** S4
Maximum drawdown	**-12.4%: peak 2022-08, trough 2023-03, recovered 2024-02** S4
Best / worst month	**4.1% / -4.8%** S4
Positive months	**31 of 48** S4
Beta to benchmark	**0.88** S4
Tracking error	**2.4%** S4
Information ratio	**-0.17** S4
95% CVaR	**Not available — historical contract did not return CVaR** S4

POLICY RISK LIMITS

METRIC	OBSERVED	LIMIT	STATUS	COVERAGE
Volatility	9.1%	12.0%	**Compliant**	48 months S3 S4
Maximum drawdown	-12.4%	-18.0%	**Compliant**	48 months S3 S4
95% CVaR	Not available	15.0%	**Not Assessed**	Observation missing S3

Analysis — Observed risk remains compliant

Observation: Realized volatility and drawdown are compliant, while CVaR is not assessed S3 S4. Why it matters: Observed risk and an unavailable measure require separate treatment. Uncertainty: Modeled-contribution assumptions do not establish governed policy status. What would change the view: A returned CVaR observation or governed risk-limit breach.

09 Projected Return and Risk Decomposition

Forward assumptions, not forecasts

GRIP SCORE	GRIP STANCE	POLICY EXPECTED RETURN	RETURN OBJECTIVE
63	Balanced	6.2%	5.5%
Available history S12	Current context S12	Governed basis S3 S8	Policy objective S3

FORWARD ASSUMPTION RANGE (TEST)

ASSUMPTION CONTEXT

Assumption set	**Example 2026 CMA (TEST)** S8
CMA release	**2026.2 (2026-06-15)** S8
Regime	**Baseline** S8
Horizon	**10 years** S8
Currency	**USD** S8
Evidence basis	**Governed policy and CMA evidence** S3,S8

FORWARD ASSUMPTIONS AND DECOMPOSITION

MEASURE	PORTFOLIO	POLICY / REFERENCE	BASIS	SOURCE
Expected return	6.2%	6.1%	10-year nominal	S3 S8
Expected volatility	Not available	Not available	No governed saved-portfolio statistic	S3
Expected max drawdown	Not available	Not available	No governed saved-portfolio statistic	S3
95% CVaR	Not available	Not available	No governed saved-portfolio statistic	S3
Largest risk contribution	Public Equity 46.0%	n/a	Forward assumptions	S7

Selected-series sandbox — not saved-portfolio analytics

Not available — no Strategy Lab return series selected. Saved-portfolio forward evidence is limited to governed policy and CMA assumptions S3 S8.

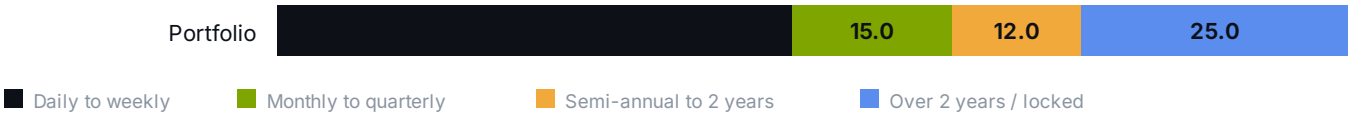

Analysis — Forward context supports monitoring

Observation: Expected return is 0.7pp above the policy objective while GRIP is balanced S3 S8 S12. Why it matters: The evidence frames monitoring without forecasting. Uncertainty: Saved-portfolio volatility, drawdown and CVaR are unavailable. What would change the view: A governed refresh below the objective or a materially different GRIP stance.

10 Liquidity and Commitments

Liquidity profile, unfunded commitments and pacing

LIQUIDITY TIERS

Governed liquidity buckets S3.

PROJECTED CALLS AND DISTRIBUTIONS (TEST)

LIQUIDITY PROFILE

BUCKET	% NAV	AMOUNT	POLICY REQUIREMENT	STATUS
Daily to weekly	48.0%	$720.0M	At least 25.0%	Compliant
Monthly to quarterly	15.0%	$225.0M	Included in liquid share	Compliant
Semi-annual to 2 years	12.0%	$180.0M	Monitor	Available
Over 2 years / locked	25.0%	$375.0M	At or below 30.0%	Watch

Buckets and governed statuses are returned by the policy contract S3.

Locked share	**25.0%** S3
Unfunded commitment ratio	**9.3%** S3
Liquid assets	**$945.0M** S3
Unfunded commitments	**$139.5M** S6
Coverage	**Complete for 31 commitments** S6

Analysis — Liquidity covers near-term calls

Observation: Daily-to-quarterly assets are 63.0% of NAV and unfunded commitments are 9.3% S3 S6. Why it matters: Liquid coverage remains compliant as calls exceed distributions. Uncertainty: Pacing results are assumptions, not confirmed call schedules. What would change the view: Calls above projections or liquid assets below policy S3 S7.

11 Coverage

Availability, basis and limitations

Organization and capabilities	Available	Live fictional TEST scope S1
Portfolio record and allocation tree	Available	5 asset classes; as of 2026-06-30 S2
Policy assessment	Available	Allocation, risk, liquidity and concentration S3
Historical returns	Available	48 months; net basis S4
Historical attribution	Degraded	Residual -2 bps vs 1 bp tolerance S5
Holdings exposure	Available	31 commitments; all pages retrieved S6
Portfolio chart packs	Available	allocations and commitments S7
Capital-market assumptions	Available	Example 2026 CMA (TEST) S8
Market context	Available	As of 2026-06-30 S9
13F look-through	Degraded	Long-only US-listed equity; as of 2026-05-15 S10
Manager diligence findings	Available	One open medium finding for a resolved manager S11
GRIP context	Available	Balanced stance with available history S12
Peer allocation intelligence	Not Licensed	Not licensed — peerIntelligence is not available for this organization
Strategy Lab supplement	Unavailable	No selected return-series session S7

B Appendix B — Server Metric Methods and Disclosures

SERVER METRIC METHODS

SOURCE	QUANTITY	METHOD / FORMULA	VERSION	BASIS / UNITS / TOLERANCE
S4	Returns	Geometrically linked server periods	historical-returns-v1	Net; decimal fraction; returned annualization
S4	Realized risk	Historical-return risk bundle	historical-risk-v1	Monthly observations; annualized where labelled
S5	Historical attribution	Realized Brinson-Fachler; symmetric-Carino linking	portfolio-attribution-v1	Percentage points; 1 bp tolerance

SOURCE	QUANTITY	METHOD / FORMULA	VERSION	BASIS / UNITS / TOLERANCE
S3	Policy status	Governed portfolio-policy assessment	portfolio-policy-v1	Returned limits, headroom and status
S6	Exposure	Server exposure aggregates	portfolio-exposure-v1	USD base currency; unfunded excluded
S7	Forward statistics	Expected-statistics and allocation chart packs	chart-contract-v1	10-year assumptions; context fingerprint retained

- Forward-looking values are assumptions, not forecasts or guarantees S7 S8.
- Performance is net of investment-management fees as returned; periods over one year are annualized only where labelled S4.
- Historical attribution uses realized Brinson-Fachler effects and symmetric-Carino linking S5.
- Private-market values and Form 13F filings may lag the report date S6 S10.
- Portfolio Analytics and Strategy Lab are separate analytical scopes S7.
- This AI-assisted monitoring analysis is not investment, legal or compliance advice.
