RECOMMENDATION

We recommend retaining the 15.0% real-assets allocation while shifting 2.0 percentage points from listed real estate to infrastructure and natural resources across marketable and drawdown sleeves S3 S4. Committee action requested: approve the target structure and phased implementation, subject to valuation refresh, manager diligence and liquidity tests S3 S7 S8.

REAL-ASSETS WEIGHT	MARKETABLE SHARE	UNFUNDED COMMITMENTS	POLICY STATUS
15.0%	8.0%	$28.0M	Watch
Policy target 15.0% S3	53.3% of real assets S4	2.8% of NAV S4	Private valuation lag S3 S4

Recommendation and action requested

We recommend a 2.0 percentage-point shift from listed real estate to infrastructure and natural resources while holding the 15.0% total allocation. Committee action requested: approve the target and staged implementation S3 S4 S8.

DECISION SUMMARY

DECISION ELEMENT	PROPOSED ACTION	EVIDENCE	STATUS
Total allocation	Hold at 15.0%	S3	Compliant
Listed real estate	Reduce from 5.0% to 3.0%	S3 S4	Proposed
Infrastructure and natural resources	Increase from 6.0% to 8.0%	S3 S4	Proposed

Conditions and limits

Refresh private valuations, confirm the commodity and inflation-linked mandate mappings, and complete manager diligence before funding S7 S8.

Key judgment — headline signal

Observation: The sample report carries a valuation-lag signal above the clear threshold S1. Why it matters: This signal focuses oversight on the report's most decision-relevant condition. Uncertainty: Evidence coverage may exclude newer or more detailed observations. What would change the view: A governed refresh showing a different signal or breached threshold.

Key judgment — primary measure

Observation: Real-assets weight is 15.0% in the review evidence S2. Why it matters: This measure establishes the baseline for comparing later governed results. Uncertainty: The source basis may omit newer observations outside the reviewed evidence. What would change the view: A refreshed source report showing a change above 1%.

Key judgment — monitoring priority

Observation: Policy status is Watch rather than Clear in the review evidence S3. Why it matters: This result determines which item receives priority in the next monitoring cycle. Uncertainty: Supporting coverage may omit later filings or corroborating detail. What would change the view: A new filing or report that resolves the item or changes it by 1%.

Marketable exposures use returned market value; drawdown exposures use NAV. Unfunded commitments are shown separately and are not added to NAV S4.

04 Target Sub-Segment Structure

Infrastructure and natural resources broaden the real-assets mix

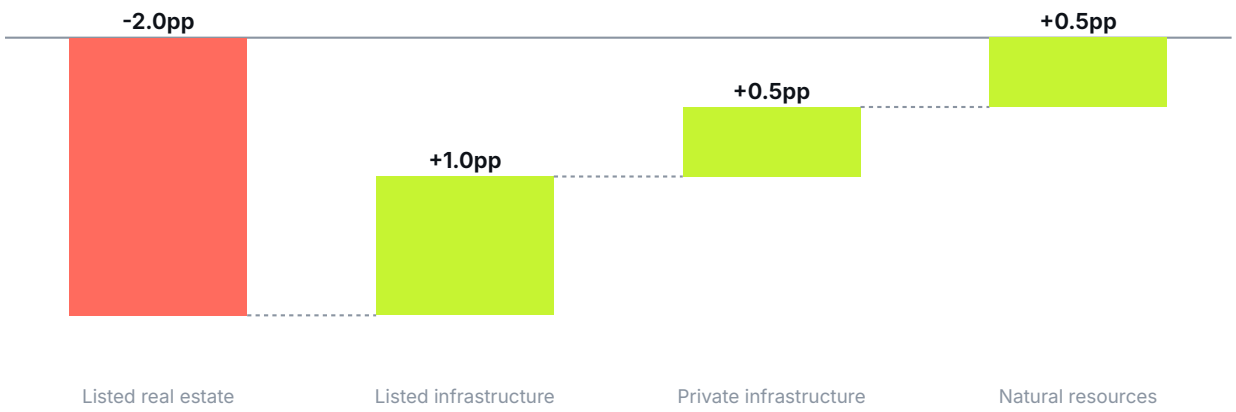

CURRENT WEIGHT VERSUS POLICY RANGE

CURRENT AND TARGET MIX

TARGET ALLOCATION CHANGES (PERCENTAGE POINTS)

CURRENT VERSUS TARGET

SUB-SEGMENT	CURRENT	TARGET	CHANGE	RANGE / CONSTRAINT	RATIONALE
Listed real estate	5.0%	3.0%	-2.0pp	2.0%–6.0%	Reduce largest sub-segment S3 S4
Listed infrastructure	3.0%	4.0%	+1.0pp	2.0%–5.0%	Increase marketable infrastructure role S3 S4
Private real estate	3.0%	3.0%	0.0pp	2.0%–5.0%	Maintain while valuations refresh S4 S8
Private infrastructure	2.5%	3.0%	+0.5pp	2.0%–4.0%	Phase after diligence S7 S8
Natural resources	1.0%	1.5%	+0.5pp	0.0%–2.0%	Broaden sub-segment mix S3 S7
Commodity securities	0.5%	0.5%	0.0pp	Mandate-specific	Maintain pending mapping review S8

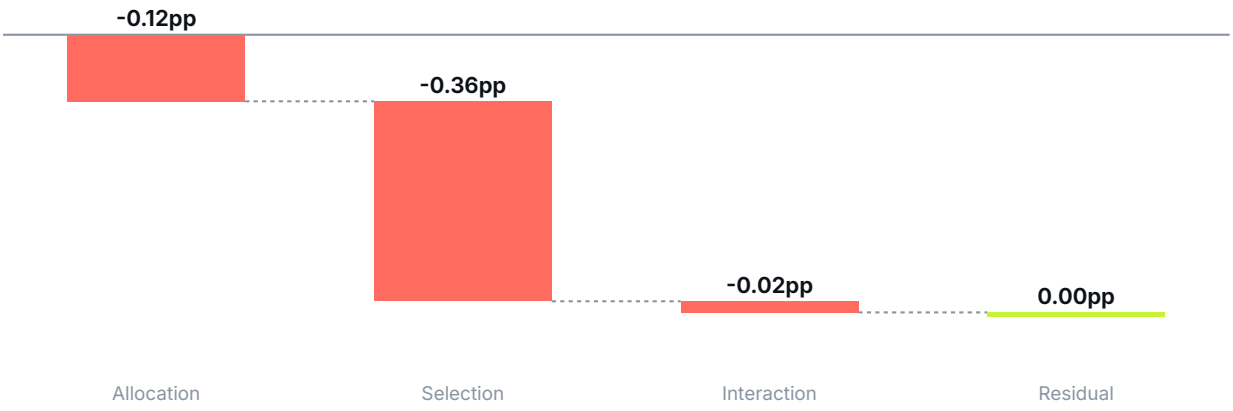

Analysis — Why this target

Observation: The target shifts 2.0 percentage points from listed real estate toward infrastructure and natural resources S3 S4. Why it matters: The largest sub-segment declines under the proposed mix. Uncertainty: CMA, regime, findings, valuation and mapping coverage remain incomplete S8. What would change the view: Completed records showing no diversification improvement S4 S8.

The target is a committee proposal and is not a saved portfolio change S3 S8.

06 Inflation, Commodity and Diversification Context

Positive sensitivities provide context, not guaranteed protection

HEADLINE INFLATION	INFLATION EXPOSURE	RATES EXPOSURE	INFLATION SENSITIVITY
2.8%	0.32	-0.18	Not available
2026-06-30 S7	Model-implied S7	Model-implied S7	No governed result S8

MODEL-IMPLIED REAL-ASSETS FACTORS

RETURNED CONTEXT

INDICATOR / EXPOSURE	OBSERVATION	CHANGE / SENSITIVITY	AS OF	SOURCE
Headline inflation	2.8%	-0.4pp year over year	2026-06-30	S7
Energy positioning	Net long index at 58th percentile	CFTC context only	2026-06-23	S7
Portfolio inflation sensitivity	Not available — no governed sensitivity result	Not assessed	2026-06-30	S8

Analysis — Context is not protection

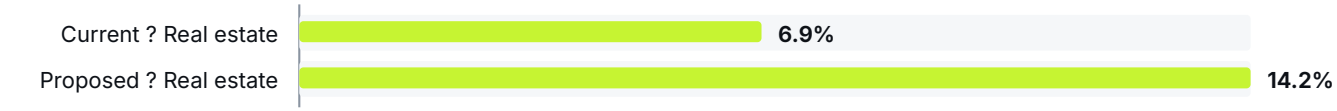

Observation: Two modeled exposures, inflation and commodities, are positive S7. Why it matters: These signals provide diversification context, not a guaranteed hedge. Uncertainty: Governed portfolio inflation sensitivity remains unavailable S8. What would change the view: Returned sensitivity results or mandate mappings contradicting both exposures S7 S8.

Macro and positioning evidence is context only; it does not establish inflation protection or explain portfolio performance S5 S7.

07 Forward Return and Risk

Governed assumptions frame tradeoffs rather than forecasts

FORWARD EXPECTED-RETURN COMPARISON

Governed forward assumptions; assumptions, not forecasts S6.

CLASS	EXPECTED RETURN	EXPECTED VOLATILITY
Real estate	6.9%	14.2%
Infrastructure	7.2%	11.8%
Natural resources	7.5%	16.8%

Analysis — Infrastructure balances risk

Observation: Infrastructure has lower expected volatility than real estate and natural resources in the selected assumptions S6. Why it matters: Its larger target role balances the broader mix. Uncertainty: Standalone governed mapping for commodity securities remains unavailable S8. What would change the view: Refreshed assumptions reversing the relative volatility results S6 S8.

FORWARD ASSUMPTIONS

11 Implementation Plan

IMPLEMENTATION STEPS

PHASE	ACTION	SIZE	FUNDING SOURCE	CONDITION	OWNER
1	Reduce listed real estate	2.0pp	Marketable sleeve	Transition review	Investment staff
2	Increase listed infrastructure	1.0pp	Sale proceeds	Policy recheck	CIO
3	Commit to private infrastructure	0.5pp	Sale proceeds and distributions	ODD and valuation refresh	Committee
4	Add natural resources	0.5pp	Sale proceeds	Manager approved	Committee

ALTERNATIVES CONSIDERED

ALTERNATIVE	BENEFIT	COST / RISK	REASON NOT SELECTED
No change	No transition	Listed real-estate concentration remains	Does not address structure objective S3 S4
Drawdown-only shift	Potential long-duration exposure	Higher lock-up and pacing risk	Marketable balance preferred S3 S4
