RECOMMENDATION

We recommend a two-year $80.0M commitment program that shifts new commitments toward infrastructure and secondary private equity while keeping private-markets exposure inside the 15.0%–30.0% policy range S3 S6. Committee action requested: approve the program ceiling and first-year pacing, subject to manager diligence and quarterly liquidity tests S3 S7.

PRIVATE-MARKETS WEIGHT	UNFUNDED COMMITMENTS	LIQUID COVERAGE	POLICY STATUS
23.0%	$92.0M	4.8x	Watch
Policy range 15.0%–30.0% S3	9.2% of NAV S4	Governed base case S3	Manager concentration S3

Recommendation and action requested

We recommend a two-year $80.0M commitment program. Committee action requested: approve a $45.0M first-year ceiling and require completed diligence before each commitment S3 S6 S7.

DECISION SUMMARY

DECISION ELEMENT	PROPOSED ACTION	EVIDENCE	STATUS
Program size	$80.0M over two years	S6	Proposed
First-year ceiling	$45.0M	S6	Proposed
Policy fit	Remain within 15.0%–30.0%	S3	Compliant

Conditions and limits

Each manager requires completed operational and GIPS diligence; quarterly pacing proceeds only while governed liquidity coverage remains at or above the returned policy threshold S3 S7.

Key judgment — headline signal

Observation: The fictional TEST report carries a pacing-and-concentration signal above the clear threshold S1. Why it matters: This signal focuses oversight on the report's most decision-relevant condition. Uncertainty: Evidence coverage may exclude newer or more detailed observations. What would change the view: A governed refresh showing a different signal or breached threshold.

Key judgment — primary measure

Observation: Private-markets weight is 23.0% in the TEST evidence S2. Why it matters: This measure establishes the baseline for comparing later governed results. Uncertainty: The source basis may omit newer observations outside this fixture. What would change the view: A refreshed source report showing a change above 1%.

Key judgment — monitoring priority

Observation: Policy status is Watch rather than Clear in the TEST evidence S3. Why it matters: This result determines which item receives priority in the next monitoring cycle. Uncertainty: Supporting coverage may omit later filings or corroborating detail. What would change the view: A new filing or report that resolves the item or changes it by 1%.

DATA STATUS	MAPPED COMPANIES	VALUED COMPANIES	ASSESSED / TOTAL	AGGREGATE COMPLETENESS	SELECTED ARTIFACTS	REPORTING DATE	DRAFT LABEL
Partial	2	2	2 / 3	Partial — one unknown-grain holding excluded	1	2026-06-30	Draft — July 22, 2026 S9

All reported private-market NAVs are dated 2026-03-31 and therefore lag the report date; unfunded amounts are shown separately and are not included in NAV. Company look-through is a non-additive risk overlay; the partial server aggregates assess two of three holdings, with one unknown grain excluded S4 S9.

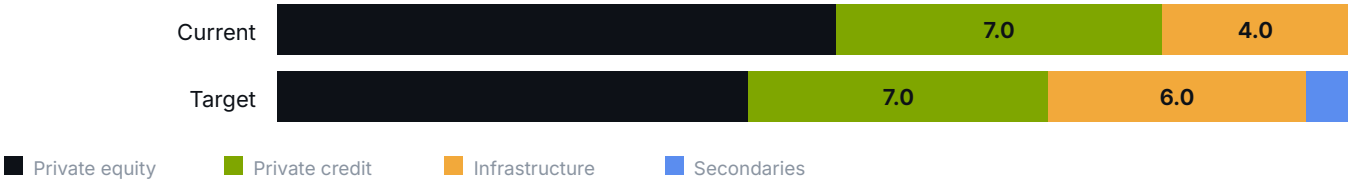

04 Target Portfolio Structure

The proposed mix reduces concentrated risk while preserving mandate exposure

CURRENT WEIGHT VERSUS POLICY RANGE

CURRENT AND TARGET MIX

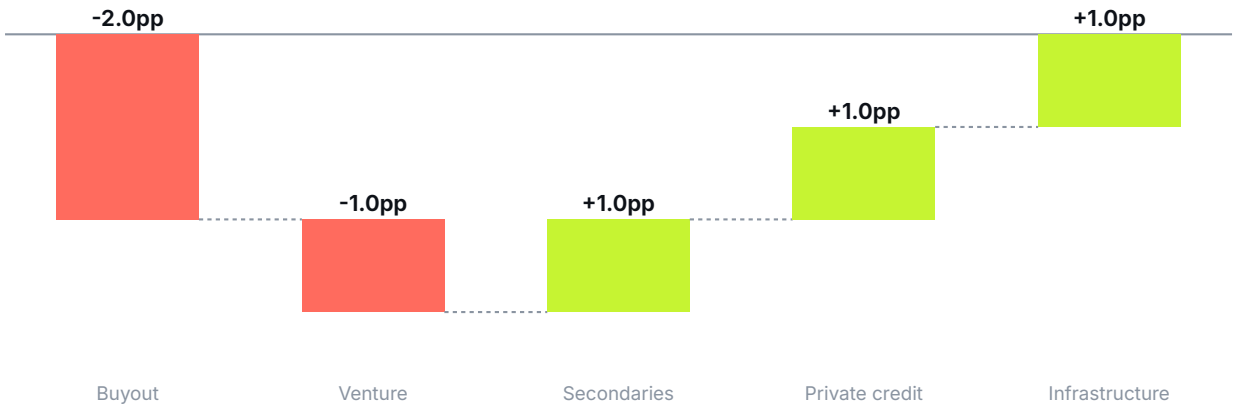

VINTAGE-YEAR MIX

Governed vintage evidence and proposed commitment pacing S6 S7.

TARGET ALLOCATION CHANGES (PERCENTAGE POINTS)

CURRENT VERSUS TARGET

SEGMENT	CURRENT	TARGET	CHANGE	RANGE / CONSTRAINT	RATIONALE
Private equity	12.0%	11.0%	-1.0pp	8.0%–16.0%	Use slower new pacing S3 S6
Private credit	7.0%	7.0%	0.0pp	4.0%–10.0%	Maintain income role S5 S7
Infrastructure	4.0%	6.0%	+2.0pp	3.0%–8.0%	Direct new commitments here S5 S6
Secondaries	0.0%	1.0%	+1.0pp	At or below 3.0%	Add vintage diversification S6 S7

Analysis — Why this target

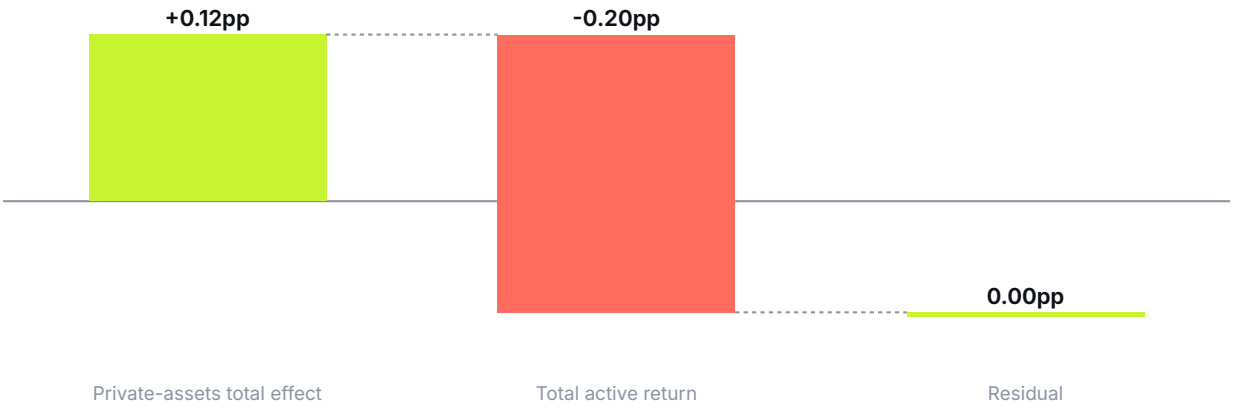

Observation: New pacing increases two roles, infrastructure and secondaries, versus the current mix S6. Why it matters: The broader mix remains inside policy boundaries S3. Uncertainty: CMA, regime and manager-finding coverage remain incomplete S7. What would change the view: Liquidity coverage below policy or completed records rejecting either role S3 S7.

Targets are a committee proposal from the fictional mandate and returned policy headroom; they are not changes saved to GradientCIO S3 S7.

Regime	**Baseline** S5
Horizon	**10 years** S5
Currency	**USD** S5
Context fingerprint	**test-pm-forward-2026** S5

PRIVATE-MARKET FORWARD ASSUMPTIONS (TEST)

SEGMENT	EXPECTED RETURN	EXPECTED VOLATILITY
Private equity	9.6%	18.5%
Private credit	7.1%	9.2%
Infrastructure	7.8%	11.8%

Analysis — Assumptions frame tradeoffs

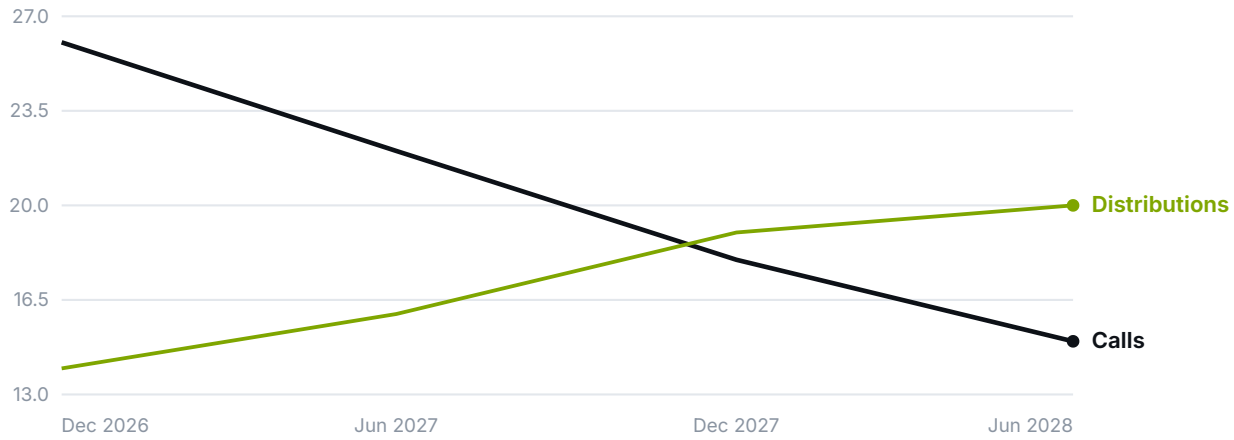

Observation: Private equity has higher expected return and volatility than every other selected segment S5. Why it matters: Segment sizing balances return potential against modeled risk. Uncertainty: These long-horizon assumptions are not manager forecasts. What would change the view: A governed assumptions refresh reversing either relative ranking S5.

The figures are long-horizon assumptions under the selected context, not forecasts or guarantees S5.

GOVERNED SCENARIO COVERAGE

Denominator stress is unavailable S3 S6.

LIQUIDITY COMPOSITION (TEST)

LIQUIDITY PROFILE

BUCKET	% NAV	AMOUNT	REQUIREMENT	STATUS
Daily to quarterly	44.0%	$440.0M	At least 25.0%	Compliant
Over two years / locked	23.0%	$230.0M	At or below 30.0%	Compliant

Liquid assets	**$440.0M** S3
Unfunded commitments	**$92.0M** S4
Base coverage	**4.8x** S3
Near-term projected calls	**$48.0M** S6

Analysis — Coverage supports pacing

Observation: Base liquid coverage is 4.8x against unfunded commitments S3 S4. Why it matters: Current resources support the staged pacing case. Uncertainty: A governed denominator-stress result remains unavailable for this portfolio. What would change the view: Lower resources, higher calls, or stress results below the policy threshold S3 S6 .

ALTERNATIVES CONSIDERED

ALTERNATIVE	BENEFIT	COST / RISK	REASON NOT SELECTED
No new commitments	Maximum liquidity	Target exposure declines	Does not address program objective S3 S6
Front-load commitments	Faster target progress	Higher near-term calls	Coverage sensitivity S3 S6

- Phase each commitment after diligence clearance S7.
- Refresh pacing and policy liquidity quarterly S3 S6.
- Return to committee if manager concentration reaches its governed limit S3.
