BOTTOM LINE

One item needs attention: Ridgeview Advisors filed a new Form ADV snapshot dated 2026-10-01, two days after its last review on 2026-09-29 S2. The monitor processed that filing and raised no alerts in any category S3, and there are no open findings S4. Review the new filing and decide whether an ODD refresh is needed; Global Macro Fund II has no new activity. The firm and fund event feed is not yet published, so absence of events is not evidence of none S5.

Observation: New alerts is 0 in the review evidence S2. Why it matters: This measure establishes the baseline for comparing later governed results. Uncertainty: The source basis may omit newer observations outside the reviewed evidence. What would change the view: A refreshed source report showing a change above 1%.

Key judgment — monitoring priority

Observation: Reviews due ≤30d is 0 in the review evidence S3. Why it matters: This result determines which item receives priority in the next monitoring cycle. Uncertainty: Supporting coverage may omit later filings or corroborating detail. What would change the view: A new filing or report that resolves the item or changes it by 1%.
