SCOPE REVIEWED · 5/7

BOTTOM LINE

Ridgeview reports $12.40B regulatory AUM, 38 private funds and no Item 11 disclosures S1. No cohort metric is in the top quartile; the highest is AUM per adviser representative at the 62.6th percentile S1. Firm events are not yet published, so completeness is degraded and this is not a clean bill of health.

REGULATORY AUM	PRIVATE FUNDS	ITEM 11	COMPOSITE
$12.4B	38	0	32.4
Item 5.F S1	Schedule D 7.B.1 S1	Disciplinary disclosures S1	Gradient risk profile S1

EVIDENCE COVERAGE

Manager Monitor	available	Aligned, 0 alerts S2
Firm & fund events	unavailable	Event publication not ready
Form 13F	available	Q2 2026 filing S3

Key judgment — headline signal

Observation: The sample report carries one clear headline signal S1. Why it matters: This signal focuses oversight on the report's most decision-relevant condition. Uncertainty: Evidence coverage may exclude newer or more detailed observations. What would change the view: A governed refresh showing a different signal or breached threshold.

Key judgment — primary measure

Observation: Regulatory AUM is $12.4B in the review evidence S2. Why it matters: This measure establishes the baseline for comparing later governed results. Uncertainty: The source basis may omit newer observations outside the reviewed evidence. What would change the view: A refreshed source report showing a change above 1%.

Key judgment — monitoring priority

Observation: Composite is 32.4 in the review evidence S3. Why it matters: This result determines which item receives priority in the next monitoring cycle. Uncertainty: Supporting coverage may omit later filings or corroborating detail. What would change the view: A new filing or report that resolves the item or changes it by 1%.

02 Firm profile & ownership

Form ADV Part 1A, report 2026-10-01

REPORTED CLIENT MIX ($B)

Every segment is supported by the returned Form ADV client-type evidence S1.

Analysis — Scale frames the operating review

Observation: The adviser reports $12.4B of RAUM and 38 private funds S1. Why it matters: Scale raises the importance of ownership and provider controls. Uncertainty: The public sample omits detailed owner records. What would change the view: Corroborated ownership records changing the control assessment.

03 Regulatory, conflicts & custody

The filing evidence identifies custody and conflict items for review

Regulatory evidence unavailable

Not available — the reviewed evidence does not include detailed regulatory rows S1.

Not available

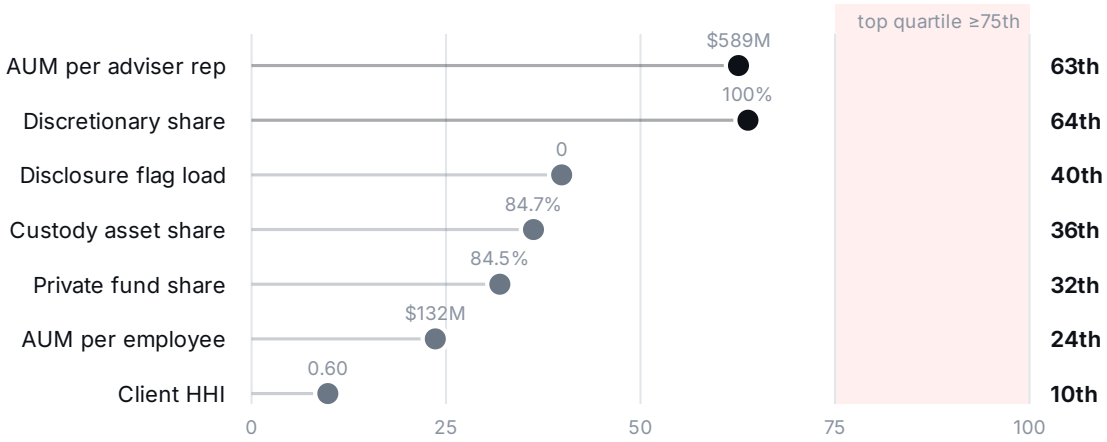

Not available — regulatory detail was not included in the reviewed evidence S1.

Analysis — Regulatory detail remains an evidence gap

Observation: Zero detailed conflict or custody rows are available in the reviewed evidence S1. Why it matters: The signal cannot be read as a clean bill of health. Uncertainty: Missing rows may contain neutral or adverse items. What would change the view: A complete validated ADV response set.

04 Peer positioning

Gradient cohort analytics · 587 advisers

Percentiles are positioning within a Gradient-selected cohort, not a quality ranking S1.

Analysis — Percentiles do not close gaps

Observation: No pillar reaches the 75th percentile, while events remain unavailable S1. Why it matters: Moderate peer positioning does not override unresolved findings. Uncertainty: Gradient-selected cohort coverage may not represent every comparable adviser. What would change the view: Refreshed results above the 75th percentile or new findings.

05 Fund operations & service providers

Service-provider evidence remains incomplete

Service-provider evidence unavailable
Not available — the reviewed evidence does not include administrator, auditor or custodian rows S1.

Not available
Not available — fund-operations detail was not included in the reviewed evidence S1.

Analysis — Fund operations are not yet corroborated
Observation: Zero fund-level provider records appear in the reviewed evidence S1. Why it matters: Independence among operating parties cannot yet be assessed. Uncertainty: Missing provider coverage is not affirmative adverse evidence. What would change the view: Validated records naming the administrator, auditor and custodian.

06 Reported equity holdings (Form 13F)

Lagged holdings provide a partial concentration lens

Holding rows unavailable
Not available — the governed Form 13F snapshot is present, but its holding rows are unavailable S3.

Not available
Not available — holding rows were not included in the reviewed evidence S3.

Analysis — Holdings evidence remains partial
Observation: One Form 13F snapshot exists, but its holding rows are unavailable S3. Why it matters: Concentration cannot be interpreted from the summary alone. Uncertainty: Form 13F coverage is lagged and partial. What would change the view: Complete holding records plus successful identity reconciliation.

07 Monitoring, findings & DDQ

Open evidence gaps define the next diligence work

GOVERNED EVENT TIMELINE

- 2026-08-14 — **Form 13F snapshot**
  Latest available lagged holdings evidence S3.
- 2026-10-01 — **Form ADV profile**
  Latest validated adviser filing evidence S1.
- Not available — **Firm and fund events**
  Event publication is not yet available in the reviewed evidence S2.

Not available
Not available — monitoring details were not included in the reviewed evidence S2.

Analysis — Event coverage limits the monitoring conclusion
Observation: Three filing dates are known, but firm and fund events are unavailable S1 S2 S3. Why it matters: A quiet timeline cannot be inferred from missing publication. Uncertainty: Unpublished event coverage may conceal immaterial or significant changes. What would change the view: Complete event records plus validated open findings.

08 Follow-up questions & open items

Not available

Not available — no follow-up questions are included in this review S1.

A Appendix — Sources and methods

Illustrative, Gradient Maintained — demo data, not the client's holdings or managers. All organizations, portfolios, managers and results in this public example are illustrative.

Full digests — S1: sha256:273814b06d98b1737c111b83024663b8e8600d4b69330958b9c6b9c61b827814; S2: sha256:2bdcc27a6e4cd1e329899b4d04e170b5c8d8495ae3ac85508662595e0ddba249; S3: sha256:b978ab9ea42f3266f45899cd2105866e57f56016496c2bd775d7260eab4fd245

- Method: the ODD signal applies the governed Item 11, finding, alert, ownership-change and cohort-percentile rules to available evidence; unavailable evidence degrades completeness rather than becoming zero S1 S2 S3.
- Form ADV is adviser-reported. Gradient cohort percentiles describe positioning, not quality or performance. Form 13F is firm-level, lagged and partial S1 S3.
- This sample report is a diligence aid, not investment, legal or compliance advice. No hire, fire, redemption, termination or allocation recommendation is made.
