OVERALL ASSESSMENT

Material policy gaps

REQUIREMENTS EVIDENCED · 5/6

BOTTOM LINE

Core governance exists, but current approval, error thresholds and supporting inventories are incomplete S1 S2.

MET	PARTIALLY MET	NOT MET	NOT FOUND
2	2	1	1
Firm and composite governance	Errors and portability	Current approval evidence	Supplemental inventory

EVIDENCE STATUS

Policies manual	**Available**	Core policies reviewed S1
Change log	**Degraded**	Current sign-off absent S2

> SYNTHETIC TEST handoff for committee-memo regression coverage. This paste-ready authoritative markdown uses fictional policies and an invented change log only.

- **Overall assessment:** Material policy gaps.
- Composite governance is documented, while error correction, portability and review evidence require follow-up.

Key judgment — evidence balance

Observation: Met is 2 and Not met is 1 S1. Why it matters: The evidence is mixed. Uncertainty: The review is document-bound. What would change the view: Additional governed evidence that changes either count.

Key judgment — partial support

Observation: Partially met is 2 S1. Why it matters: Partial support limits a clean conclusion. Uncertainty: Missing documents may exist. What would change the view: Complete evidence for the partially supported requirements.

Key judgment — evidence gaps

Observation: Not found is 1 S1. Why it matters: Unlocated evidence remains outside the assessment. Uncertainty: Absence from the supplied record is not proof of absence. What would change the view: A current document resolving the gap.

Analysis — Approval evidence is stale

Observation: The current policy approval is not evidenced S2. **Why it matters:** governance cannot be tied to the current manual. **Uncertainty:** approval may exist outside the supplied log. **What would change the view:** evidence closing follow-up request 2.

REQUIREMENT EVIDENCE MATRIX (TEST)

REQUIREMENT	EVIDENCE SCORE
PERFORMANCE RECORD	1.0
DISCLOSURES	0.5
GOVERNANCE EVIDENCE	-0.5

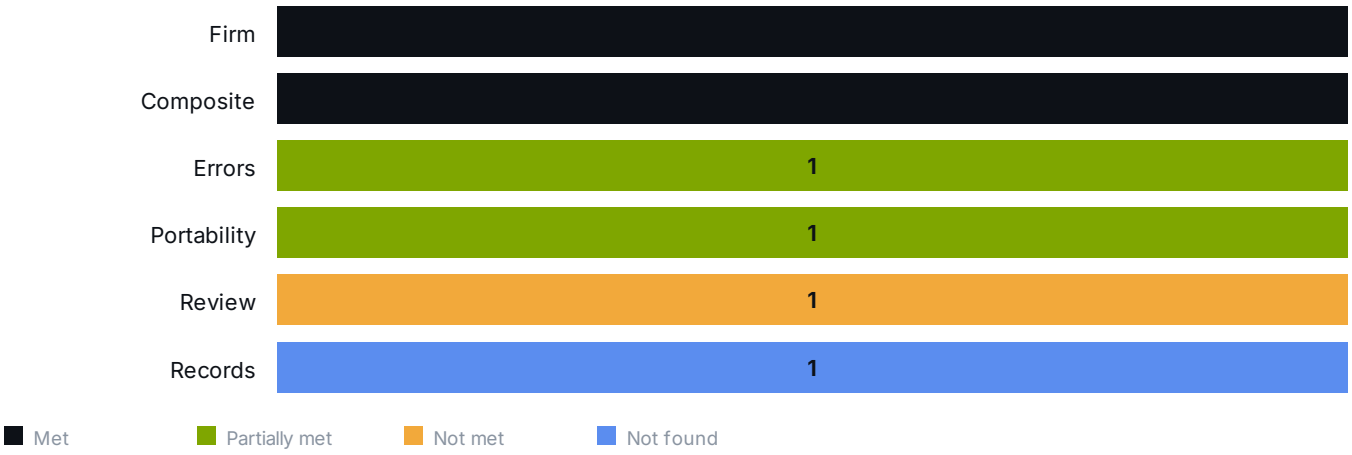

The fictional manual defines the firm and composite creation process S1. The change log supports one annual review, but no signed current-period approval is included S2.

03 Follow-up Requests

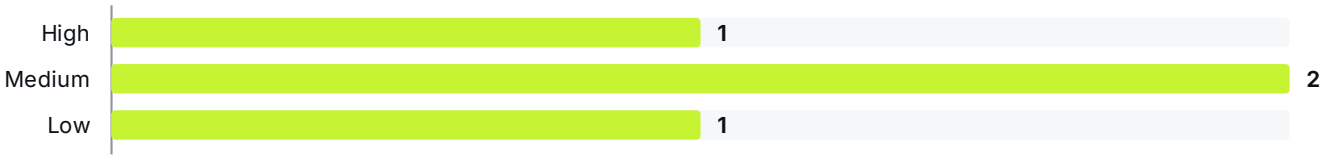

1. Provide approved error-correction materiality thresholds.
2. Provide current sign-off and the supplemental-information inventory.
