BOTTOM LINE

Three advisers were compared for the global macro mandate: Ridgeview reports $12.40B regulatory AUM, Harbor $4.85B and Northfield $1.92B S1 S2 S3. None reports an Item 11 disciplinary disclosure S1 S2 S3. Harbor has 2 of 9 private funds with no administrator named and Northfield reports custody through a related person, so both carry medium flags S2 S3. Weighted 13F overlap between Ridgeview and Harbor is 18.4% for the 2026-06-30 period S6; Northfield is not in the diligence catalog, so it has no 13F, consistency or events evidence. This is an evidence comparison, not a ranking.

Order follows the user's list. Flags are evidence for follow-up, not a verdict on the manager.

Key judgment — headline signal

Observation: The fictional TEST report carries a 2 of 3 managers with flags signal S1. Why it matters: This signal focuses oversight on the report's most decision-relevant condition. Uncertainty: Evidence coverage may exclude newer or more detailed observations. What would change the view: A governed refresh showing a different signal or breached threshold.

Key judgment — primary measure

Observation: Managers compared is 3 in the TEST evidence S2. Why it matters: This measure establishes the baseline for comparing later governed results. Uncertainty: The source basis may omit newer observations outside this fixture. What would change the view: A refreshed source report showing a change above 1%.

Key judgment — monitoring priority

Observation: Item 11 disclosures is 0 in the TEST evidence S3. Why it matters: This result determines which item receives priority in the next monitoring cycle. Uncertainty: Supporting coverage may omit later filings or corroborating detail. What would change the view: A new filing or report that resolves the item or changes it by 1%.

Auditor, administrator and custodian counts are private funds with a provider named in Schedule D 7.B.1, out of funds returned. 'Yes' responses count affirmative Form ADV answers, not disciplinary events.

Cohort percentiles are not comparable across managers

Each adviser is positioned within its own Gradient-selected cohort (Ridgeview: 214 advisers; Harbor: 187; Northfield: 96) S7. Percentiles are positioning, not a quality ranking.

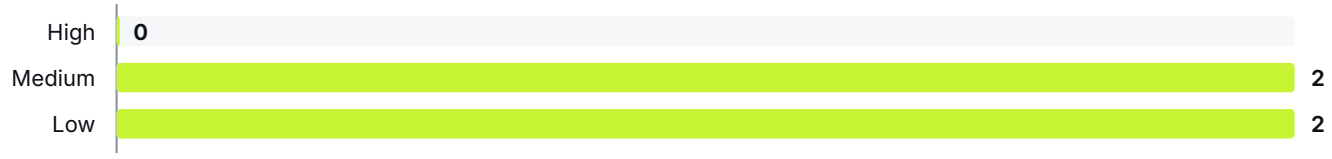

Analysis — Scale differs without deciding mandate fit

Observation: Ridgeview reports the most RAUM and clients; all three report zero Item 11 disclosures S1 S2 S3. Why it matters: Scale changes operating complexity, not mandate quality. Uncertainty: Adviser cohorts differ in strategy and client bases. What would change the view: User criteria requiring a named operating-scale threshold.

03 Operational flags

Evidence that needs follow-up, per manager

OPEN FLAGS BY SEVERITY

Ridgeview Example Advisors (TEST): no flags identified

Checked: Form ADV profile, Schedule D service providers, 13F, ADV–13F consistency, open findings S1 S4 S8 S9. Events not published S10.

MEDIUM **Harbor Example Capital (TEST): 2 of 9 private funds name no administrator**
Schedule D 7.B.1 rows for Harbor Example Opportunities Fund (TEST) and Harbor Example Credit Fund (TEST) leave the administrator blank S2. Ask who prepares investor statements.

LOW **Harbor Example Capital (TEST): PCAOB registry check unavailable**
Auditor Example Audit LLP is named on all funds; Gradient's PCAOB registry evidence was unavailable (advisory) S2.

MEDIUM **Northfield Example Capital (TEST): custody through a related person**
Item 9 reports a related person with custody of client assets; independent verification answer not found in the returned data S3.

LOW **Northfield Example Capital (TEST): not in diligence catalog**
No catalog firm ID, so 13F, consistency, events and findings are not available S3.

Analysis — Evidence gaps differ

Observation: Harbor lacks complete provider evidence, while Northfield also lacks catalog identity S2 S3. Why it matters: The gaps require different diligence paths before selection. Uncertainty: The compact fixture omits some corroborating provider detail. What would change the view: Updated governed records resolving either named evidence gap.

Example Software Inc (TEST)	000000CC3	$71.8M	$22.9M

How to read this

Overlap uses same-period, complete SEC Form 13F reported long positions. It excludes shorts, cash, many non-US securities and confidential-treatment holdings, and does not imply manager intent S6. 13F is firm-level and lagged; it is not the mandate's portfolio.

Analysis — Reported overlap is limited

Observation: Ridgeview and Harbor have 18.4% weighted overlap across 31 positions S6. Why it matters: Their reported long books are not interchangeable. Uncertainty: Northfield lacks usable same-period Form 13F identity coverage. What would change the view: Complete same-period filings showing materially different weighted overlap.

05 ADV–13F consistency and events

Identity, recency and scope flags — not a diligence conclusion

Firm and fund event timeline

Not available — event publication is not ready for Ridgeview or Harbor; Northfield is not in the diligence catalog S10 S3. Absence is not evidence of no events.

MANAGER	ADV RAUM	13F TOTAL	13F / RAUM	13F AGE	IDENTITY	FLAGS
Ridgeview (TEST)	$12.40B	$3.21B	25.9% S8	96 days	Unconfirmed	13F subset of RAUM S8
Harbor (TEST)	$4.85B	$1.07B	22.1% S11	96 days	Unconfirmed	13F subset of RAUM S11
Northfield (TEST)	$1.92B	n/a	n/a	n/a	n/a	Not in catalog

Analysis — Identity and coverage gaps govern interpretation

Observation: Ridgeview and Harbor have usable consistency checks, while Northfield is outside the catalog S8 S11 S3. Why it matters: Evidence depth materially differs across the three managers. Uncertainty: Northfield event coverage and catalog identity remain unavailable. What would change the view: Catalog resolution plus published Northfield event records.
