Northstar Portfolio Fit Review

Candidate manager contribution to total-fund objectives

REVIEW
Portfolio fit

PREPARED FOR
Investment Committee

DATA AS OF
2025-12-31

01 Executive conclusion

Evidence does not support a comparative conclusion

Key judgment — Coverage

Observation: Only one of four portfolio-fit inputs is available S1. Why it matters: Diversification benefit cannot be estimated. Uncertainty: Missing series may change the correlation. What would change the view: Return series for the manager and the portfolio.

Key judgment — Benchmarks

Observation: The benchmark match is suggested, not confirmed S1. Why it matters: Fit is judged against the sleeve benchmark. Uncertainty: Mandate fit is unconfirmed. What would change the view: A confirmed benchmark mapping.

Key judgment — Reliability

Observation: Fit across market regimes was not tested S1. Why it matters: A manager can diversify in one regime and not another. Uncertainty: Results may depend on the window. What would change the view: A regime-split analysis.

02 Baseline and proposed scenario

Benchmark matches are suggested, not yet confirmed

Benchmark mapping	**Not available**	Match not confirmed S1

03 Correlation and diversification

Risk and return comparison is unavailable

Not available. The comparison tool returned no results for these candidates S1.

Analysis — Comparison unavailable

Observation: No comparison metrics were returned for the four candidates S1. Why it matters: Without them, no ranking of the candidates is supportable. Uncertainty: The missing evidence may differ by manager. What would change the view: Comparison results for each candidate.

04 Return and risk impact

Relative and capture evidence is unavailable

Not available. Benchmark-relative returns were not returned S1.

Analysis — Relative evidence missing

Observation: Benchmark-relative returns were not returned for any candidate S1. Why it matters: Behavior against the mandate benchmark is unknown. Uncertainty: Up and down capture may vary by window. What would change the view: Benchmark-relative results for each candidate.

05 Simulation and stress

Persistence and correlation evidence is unavailable

Not available. Persistence and correlation tests were not returned S1.

Analysis — Robustness unavailable

Observation: Persistence and correlation tests were not returned S1. Why it matters: Whether results repeat across periods cannot be assessed. Uncertainty: Results may depend on the dates chosen. What would change the view: Tests across several date windows.

06 Constraints and follow-ups

One data request remains

01 **Confirm the benchmark and return the comparison results.**
Required to assess manager-relative performance S1.

A Appendix — Sources and methods

Saved illustrative sample evidence

Based on 1 of 4 evidence areas.

TAG	EVIDENCE	SOURCE	AS OF	CHECK
S1	Connector capabilities check	get_gradient_capabilities	2025-12-31	Passed

Illustrative, Gradient Maintained — demo data, not the client's holdings or managers. All organizations, portfolios, managers and results in this public example are illustrative.
