EVIDENCE COMPLETENESS · 5/7

BOTTOM LINE

Ridgeview reports $12.40B regulatory AUM, 38 private funds and no Item 11 disclosures S1. No cohort metric is in the top quartile; the highest is AUM per adviser representative at the 62.6th percentile S1. Firm events are not yet published, so completeness is degraded and this is not a clean bill of health.

REGULATORY AUM	PRIVATE FUNDS	ITEM 11	COMPOSITE
$12.4B	38	0	32.4
Item 5.F S1	Schedule D 7.B.1 S1	Disciplinary disclosures S1	Gradient risk profile S1

Form 13F	**Available**	Q2 2026 filing S3

Key judgment — headline signal

Observation: The fictional TEST report carries a clear signal S1. Why it matters: The signal frames the review. Uncertainty: Evidence coverage is bounded. What would change the view: New governed evidence that changes the signal.

Key judgment — primary measure

Observation: Regulatory AUM is $12.4B in the TEST evidence S2. Why it matters: This measure anchors the executive view. Uncertainty: The fixture is deliberately compact. What would change the view: A refreshed source with a materially different value.

Key judgment — monitoring priority

Observation: Composite is 32.4 in the TEST evidence S3. Why it matters: It identifies a monitoring priority. Uncertainty: Supporting detail is limited. What would change the view: Corroborated evidence that resolves or reverses the item.

02 Firm profile & ownership

Form ADV Part 1A, report 2026-10-01

Visual evidence

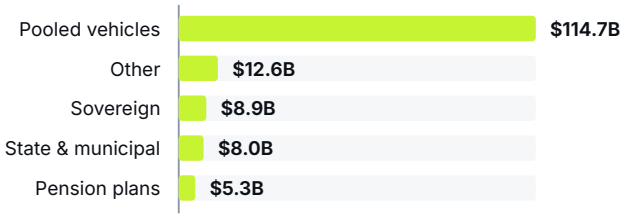

Not available — No governed visual was returned for this fictional TEST fixture.

REGULATORY AUM	CLIENTS	EMPLOYEES	PRIVATE FUNDS

Custody	**$127.22B** S1

RAUM BY CLIENT TYPE ($B)

Analysis — Scale frames the operating review

Observation: The TEST adviser reports $12.4B of RAUM and 38 private funds S1. Why it matters: Scale raises the importance of ownership and service-provider controls. Uncertainty: The compact fixture omits owner detail. What would change the view: Corroborated ownership evidence that changes the control assessment.

03 Regulatory, conflicts & custody

The filing evidence identifies custody and conflict items for review

Visual evidence

Not available — No governed visual was returned for this fictional TEST fixture.

Not available

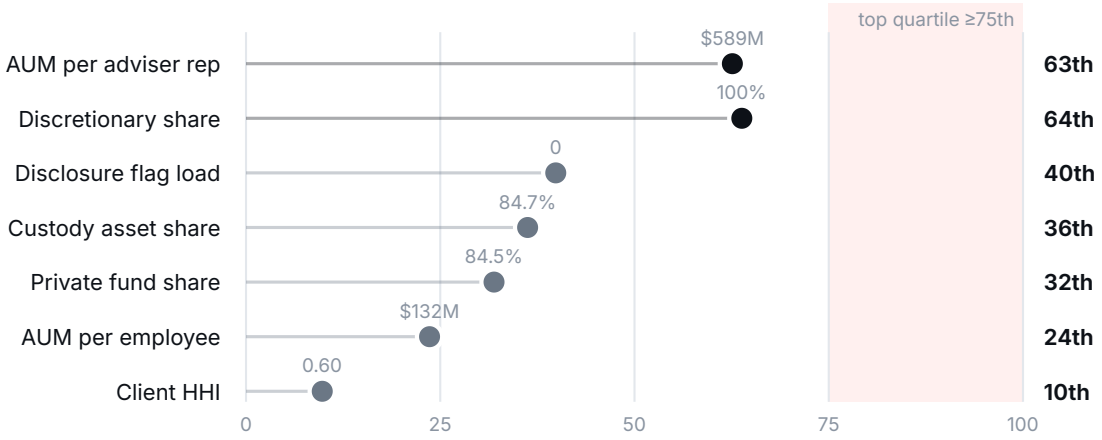

Not available — this compact render fixture does not include regulatory detail S1.

Analysis — Regulatory detail remains an evidence gap

Observation: Detailed conflict and custody rows are unavailable in this compact TEST record S1. Why it matters: The signal cannot be read as a clean bill of health. Uncertainty: Missing detail may contain neutral or adverse items. What would change the view: A validated complete ADV response set.

04 Peer positioning

Gradient cohort analytics · 587 advisers

Percentiles are positioning within a Gradient-selected cohort, not a quality ranking S1.

Analysis — Percentiles do not close gaps

Observation: No pillar reaches the 75th percentile, while events remain unavailable S1. Why it matters: Moderate peer positioning does not override unresolved findings or gaps in the composite signal. Uncertainty: The cohort is Gradient-selected. What would change the view: New findings or materially different validated pillar percentiles.

05 Fund operations & service providers

Service-provider evidence remains incomplete in the compact TEST record

Visual evidence

Not available — No governed visual was returned for this fictional TEST fixture.

Not available

Not available — this compact render fixture omits fund operations S1.

Analysis — Fund operations are not yet corroborated

Observation: Fund-level service-provider evidence is absent from the compact TEST record S1. Why it matters: Operating-party independence cannot be assessed. Uncertainty: Absence is not adverse evidence. What would change the view: Validated fund records naming the administrator, auditor and custodian.

06 Reported equity holdings (Form 13F)

Lagged holdings provide a partial concentration lens

Visual evidence

Not available — No governed visual was returned for this fictional TEST fixture.

Not available

Not available — this compact render fixture omits holding rows S3.

Analysis — Holdings evidence remains partial

Observation: A Form 13F snapshot exists, but holding rows are omitted from this TEST fixture S3. Why it matters: Concentration cannot be interpreted from the summary alone. Uncertainty: Form 13F is lagged and partial. What would change the view: Complete validated holding rows and identity reconciliation.

07 Monitoring, findings & DDQ

Open evidence gaps define the next diligence work

Visual evidence

Not available — No governed visual was returned for this fictional TEST fixture.

GOVERNED EVENT TIMELINE

2026-08-14	**Form 13F snapshot** — Latest available lagged holdings evidence S3.
2026-10-01	**Form ADV profile** — Latest validated adviser filing evidence S1.
Not available	**Firm and fund events** — Event publication is not yet available in the TEST record S2.

Not available

Not available — this compact render fixture omits monitoring details S2.

Analysis — Event coverage limits the monitoring conclusion

Observation: Filing dates are known, but firm and fund events are unavailable S1 S2 S3. Why it matters: A quiet timeline cannot be inferred from missing publication. Uncertainty: Unpublished events may be immaterial or significant. What would change the view: Complete event coverage with validated open findings.

08 Follow-up questions & open items

Not available

Not available — no follow-up questions are included in this compact render fixture S1.

09 Appendix — sources & method
