01 Executive Decision

Redemption terms need confirmation before funding

RECOMMENDATION

We recommend retaining the 12.0% marketable-alternatives allocation while shifting 2.0 percentage points from equity long/short to macro and relative-value roles S3 S4.
Committee action requested: approve the target structure and staged manager review, subject to verified redemption terms and completed diligence S3 S7 S8.

MARKETABLE-ALTERNATIVES WEIGHT	ACTIVE WEIGHT	RELATIVE RETURN	LIQUID SHARE
12.0%	0.0pp	+0.6pp	8.0%
Policy target 12.0% S3	Total-fund target S3	Trailing 1Y versus benchmark S5	Monthly or better as % NAV S3

Recommendation and action requested

We recommend a 2.0 percentage-point strategy shift within the existing 12.0% allocation. Committee action requested: approve the target mix and authorize manager review, with no funding until redemption and diligence conditions are complete S3 S4 S7 S8.

DECISION SUMMARY

DECISION ELEMENT	PROPOSED ACTION	EVIDENCE	STATUS
Total allocation	Hold at 12.0%	S3	Compliant
Equity long/short	Reduce from 5.0% to 3.0%	S3 S4	Proposed
Macro and relative value	Increase from 4.0% to 6.0%	S3 S4	Proposed

Conditions and limits

Confirm notice periods, gates and side-pocket terms for each affected fund and complete ODD before implementation S7 S8.

Key judgment — Redemption terms

Observation: Notice periods, gates and side-pocket terms are unconfirmed for the affected funds S1. Why it matters: Funding before confirmation could lock capital beyond policy limits. Uncertainty: Terms come from manager documents still in review. What would change the view: Confirmed terms inside the policy liquidity window.

Key judgment — Sleeve size

Observation: Marketable alternatives are 12.0% of total NAV S2. Why it matters: The 2.0pp strategy shift stays within this allocation. Uncertainty: Hedge fund values are reported with a lag. What would change the view: A revised valuation that moves the weight outside its range.

Key judgment — Liquidity

Observation: Only 8.0% of the sleeve is liquid within the policy window S3. Why it matters: Redemption terms, not returns, constrain how fast the shift can happen. Uncertainty: Gates can be applied at the manager's discretion. What would change the view: A manager applying or lifting a gate.

GOVERNED FRAMEWORK

AREA	OBJECTIVE OR LIMIT	OBSERVED	STATUS	SOURCE
Marketable alternatives	8.0%–16.0%	12.0%	Compliant	S3
Single manager	At or below 4.0% of NAV	4.0%	Near limit	S3 S4
Monthly-or-better liquidity	At least 7.0% of NAV	8.0%	Compliant	S3

03 Current Hedge Fund Portfolio

HEDGE-FUND STRATEGY ALLOCATION

CURRENT SLEEVE

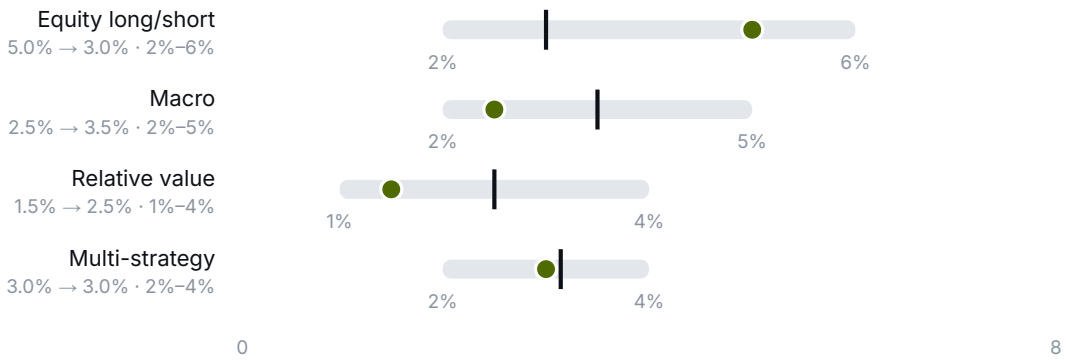

STRATEGY / MANAGER	ROLE	VALUE	% PORTFOLIO	% SLEEVE	AS OF
Example Alpha Partners	Equity long/short	$50.0M	5.0%	41.7%	2026-06-30 S4
Example Macro Fund	Macro	$25.0M	2.5%	20.8%	2026-06-30 S4
Example Relative Value Fund	Relative value	$15.0M	1.5%	12.5%	2026-06-30 S4
Example Multi-Strategy Fund	Multi-strategy	$30.0M	3.0%	25.0%	2026-06-30 S4

Strategy and role labels are shown as returned; they do not establish leverage, liquidity or underlying positions S4.

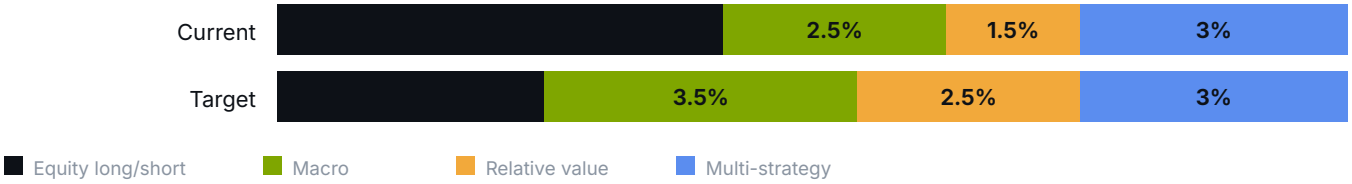

04 Target Strategy and Manager Structure

A broader strategy mix lowers single-role concentration

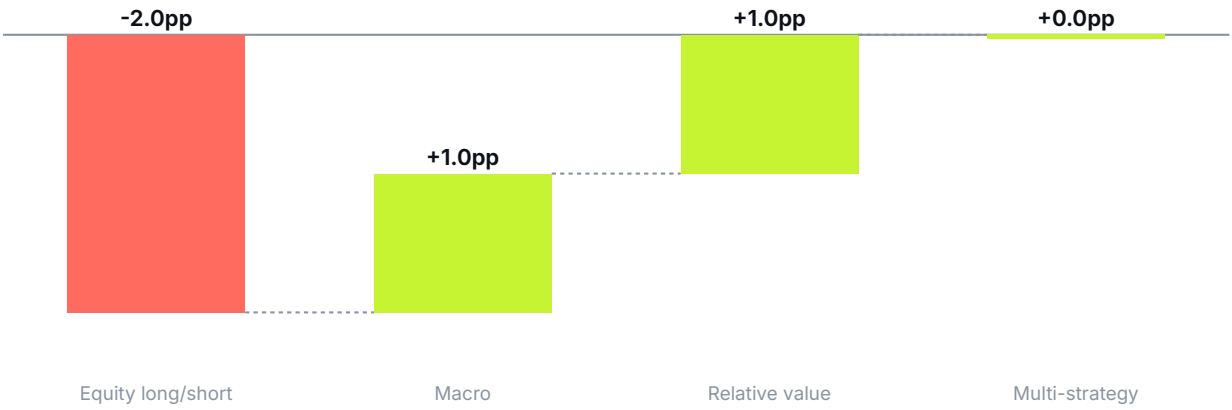

CURRENT WEIGHT VERSUS POLICY RANGE

CURRENT AND TARGET STRATEGY MIX

TARGET ALLOCATION CHANGES (PERCENTAGE POINTS)

CURRENT VERSUS TARGET

STRATEGY / ROLE	CURRENT	TARGET	CHANGE	RANGE / CONSTRAINT	RATIONALE
Equity long/short	5.0%	3.0%	-2.0pp	2.0%–6.0%	Reduce largest strategy concentration S3 S4
Macro	2.5%	3.5%	+1.0pp	2.0%–5.0%	Increase diversifying role subject to diligence S7 S8
Relative value	1.5%	2.5%	+1.0pp	1.0%–4.0%	Broaden strategy mix subject to terms S7 S8
Multi-strategy	3.0%	3.0%	0.0pp	2.0%–4.0%	Maintain current role S3 S4

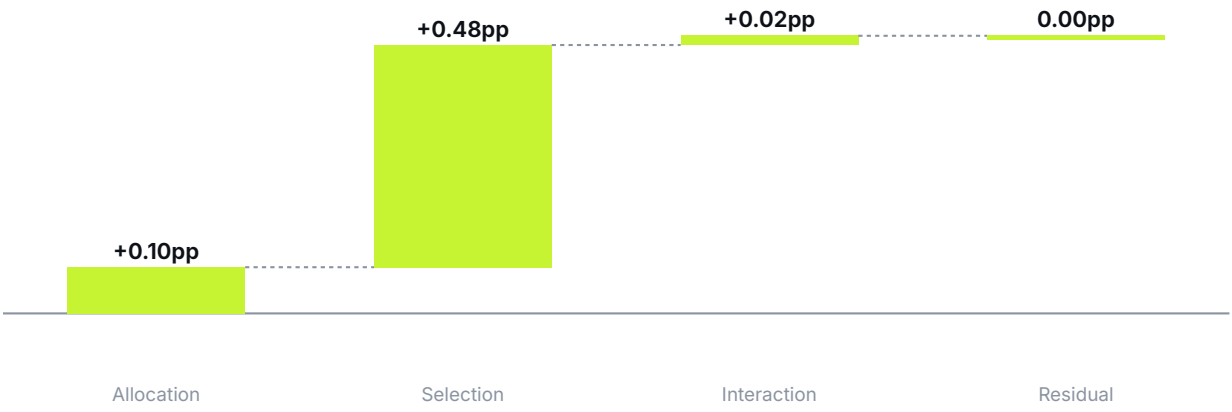

Analysis — Why this target

Observation: The target reallocates 2.0 percentage points from equity long/short to macro and relative value S3 S4. Why it matters: The largest strategy concentration declines under the target. Uncertainty: CMA, regime, findings and term coverage remain incomplete S7 S8. What would change the view: Completed records contradicting either proposed strategy role S7 S8.

The target is a committee proposal and is not a saved portfolio change S3 S8.

Returned strategy-correlation evidence S7.

MODEL-IMPLIED FACTOR EXPOSURES

GOVERNED CONCENTRATION

AXIS	OBSERVED	LIMIT	STATUS	SOURCE
Largest manager	4.0% of NAV	4.0%	**Near limit**	S3 S4
Largest strategy	5.0% of NAV	6.0%	**Compliant**	S3 S4
13F equity subset	Not available — manager identifiers incomplete	Not assessed	**Not assessed**	S7

Analysis — Manager limit is binding

Observation: The largest manager is at the 4.0% policy limit S3 S4. Why it matters: New funding should not increase that concentration. Uncertainty: Model factors and incomplete look-through omit the full hedge-fund book S7. What would change the view: Complete exposure records showing concentration below the 4.0% threshold S4 S7.

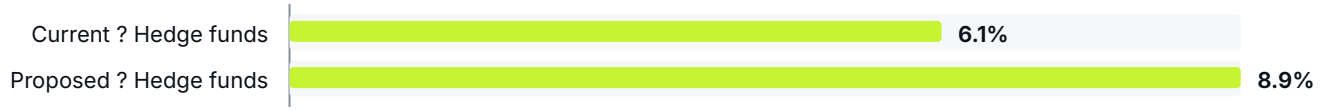

Look-through limitation

Any Form 13F evidence is lagged, long-only US-listed equity, excludes shorts, derivatives, cash and non-US listings, and is not a complete hedge-fund exposure view S7.

07 Forward Return and Risk

Governed assumptions frame tradeoffs rather than forecasts

FORWARD EXPECTED-RETURN COMPARISON

Governed forward assumptions; assumptions, not forecasts S6.

Assumption set	**2026 Strategic CMA** S6
Regime	**Baseline** S6
Horizon	**5 years** S6
Currency	**USD** S6
Context fingerprint	**test-ma-forward-2026** S6

MARKETABLE-ALTERNATIVES FORWARD ASSUMPTIONS

CLASS	EXPECTED RETURN	EXPECTED VOLATILITY
Hedge funds	6.1%	8.9%
Absolute return	5.5%	7.1%

> **Analysis — Assumptions show tradeoff**
> Observation: Hedge funds carry higher expected return and volatility than absolute return in the selected assumptions S6. Why it matters: The target should preserve role diversification, not maximize one measure. Uncertainty: Class assumptions are not manager-level forecasts. What would change the view: Refreshed assumptions reversing the relative return or volatility results S6.

These figures are assumptions under the selected context, not forecasts or guarantees S6.

08 Liquidity, Redemption and Operational Terms

LIQUIDITY COMPOSITION

LIQUIDITY PROFILE

BUCKET / TERM	% NAV	AMOUNT	REQUIREMENT	STATUS
Monthly or better	8.0%	$80.0M	At least 7.0%	**Compliant**
Quarterly	4.0%	$40.0M	Monitor	**Available**

REDEMPTION EVIDENCE

MANAGER / FUND	FREQUENCY	NOTICE	GATE / SIDE POCKET	SOURCE
Example Alpha Partners	Quarterly	60 days	Not available — terms not returned	S8
Example Macro Fund	Monthly	30 days	No gate reported	S8
Example Relative Value Fund	Monthly	45 days	Not available — terms not returned	S8
Example Multi-Strategy Fund	Quarterly	90 days	Not available — terms not returned	S8

Redemption frequency and notice are user-document evidence; missing gates, side pockets and leverage remain open items S8.
