Northstar Manager Shortlist

Candidate screening for Investment Committee review

REVIEW
Manager shortlist

PREPARED FOR
Investment Committee

DATA AS OF

01 Executive conclusion

Evidence does not support a comparative conclusion

Key judgment — Coverage

Observation: Only one of four screening inputs is available S1. Why it matters: A shortlist would rest on incomplete data. Uncertainty: Missing reads may change which managers qualify. What would change the view: Complete screening data for every candidate.

Key judgment — Benchmarks

Observation: Benchmark matches are suggested, not confirmed S1. Why it matters: Candidates must be compared on the same benchmark. Uncertainty: Mandate fit is unconfirmed. What would change the view: Confirmed benchmark mappings.

Key judgment — Reliability

Observation: Return persistence was not tested S1. Why it matters: A shortlist should favor repeatable results. Uncertainty: Persistence is unknown. What would change the view: A robustness run for each candidate.

02 Mandate and screening coverage

Benchmark matches are suggested, not yet confirmed

Benchmark mapping	**Not available**	Match not confirmed S1

03 Candidate evidence

Risk and return comparison is unavailable

Not available. The comparison tool returned no results for these candidates S1.

Analysis — Comparison unavailable

Observation: No comparison metrics were returned for the four candidates S1. Why it matters: Without them, no ranking of the candidates is supportable. Uncertainty: The missing evidence may differ by manager. What would change the view: Comparison results for each candidate.

04 Performance comparison

Relative and capture evidence is unavailable

Not available. Benchmark-relative returns were not returned S1.

Analysis — Relative evidence missing

Observation: Benchmark-relative returns were not returned for any candidate S1. Why it matters: Behavior against the mandate benchmark is unknown. Uncertainty: Up and down capture may vary by window. What would change the view: Benchmark-relative results for each candidate.

05 Advance/reserve/reject rationale

Persistence and correlation evidence is unavailable

Not available. Persistence and correlation tests were not returned S1.

Analysis — Robustness unavailable

Observation: Persistence and correlation tests were not returned S1. Why it matters: Whether results repeat across periods cannot be assessed. Uncertainty: Results may depend on the dates chosen. What would change the view: Tests across several date windows.

06 ODD handoff

One data request remains

01 **Confirm the benchmark and return the comparison results.**
Required to assess manager-relative performance S1.
